Case Log Information for Dermatology Programs

Background
The ACGME-I Case Log System is a data depository to support programs in complying with Advanced Specialty Requirements and to enable program directors to monitor each resident’s clinical experience by capturing and categorizing resident cases.

The Medicine-based Review Committee-International examines cases completed by graduating residents to determine a program’s compliance with clinical experience requirements, judge if educational resources are sufficient for the program’s accredited complement of residents, and evaluate the breadth and depth of resident experiences. The Committee understands that achievement of the minimum number for each listed procedure does not signify achievement of competence in any procedure, nor do the cases that must be logged represent the totality of clinical competency needed in any given specialty. Most importantly, meeting the minimum requirements for procedures does not replace or negate the requirement that, upon a resident’s completion of the program, the program director must verify that he or she has demonstrated sufficient competence to enter practice without direct supervision.

Residents have a responsibility to enter cases accurately and in a timely manner. It is recommended that residents log cases daily or at least weekly. Residents must continue to log cases throughout the duration of their program, even if the minimum requirements have been met.

Program directors have the responsibility to regularly review and analyze each resident’s completed cases. It is recommended that program directors review the Case Minimums Report at least quarterly to ensure each resident is making appropriate progress toward meeting the required minimum numbers.

The Accreditation Data System (ADS) Case Log tab includes general references on entering and retrieving information. Each specialty’s page on the ACGME-I website contains additional Case Log references, including a Resident Quick Guide with definitions and case entry requirements particular to the specialty and a Faculty and Staff Quick Guide to assist program directors and faculty members choose and evaluate Case Log reports. Residents are encouraged to review these resources prior to their first case entries and to continue to refer to them as needed. Program directors can use information from the reports in ADS to review resident progress toward meeting clinical experience requirements, to set and evaluate curriculum, and to inform clinical faculty members about residents’ clinical experience needs.
FREQUENTLY ASKED QUESTIONS

1. Why are minimum numbers used?
   The Medicine-based Review Committee-International determined that minimum numbers for key procedures would provide information on clinical resources without detracting from the latitude that the program director must have to manage the clinical curriculum.

2. How were case and procedure categories and minimum numbers identified? The ACGME-I uses the same case and procedure categories and minimum numbers that are used for residency training in the United States. In the US, some specialties determined minimum case numbers after the specialty Review Committee analyzed national data for graduating residents. Some specialties worked with their respective boards to determine case and procedural categories and minimum numbers.

   The Review Committee-International felt adhering to the same numbers as in the US provided a baseline to begin monitoring ACGME-I-accredited programs. Minimum numbers have been in place in the US for a number of years. In addition to the information obtained from block diagrams and ACGME-I Resident and Faculty Survey results, Case Logs for graduating residents are recognized as one important data point for judging resident clinical experience. The Review Committee-International will continue to monitor Case Log reports for graduating residents to determine if the use of US minimum numbers will need modification for the international community.

3. How do residents enter cases?
   The ACGME-I Case Log System uses descriptors to identify and log cases. The Review Committee-International will evaluate graduate resident cases based on descriptions of the procedures including the type of procedure and the area where the procedure was performed.

4. If the institution uses an electronic system to track cases, duty hours, resident evaluations, etc., can the Case Log data from this system be uploaded into ADS? No. At present there is no mechanism to electronically transfer cases from another system into ADS. The program director has ultimate responsibility to ensure that all data reported in ADS is accurate and complete, and should encourage residents to enter their case data daily in the Case Log System in ADS.

   Note that if your institution’s electronic system has the capability, it may be possible to download ADS Case Log data into your system. Contact technical support at ADS@acgme.org to obtain technical assistance for this function.

5. Will residents have access to their Case Logs after graduation?
   Yes. Residents can access their Case Log reports after completion of the program to use for hospital credentialing, apply for fellowships, etc. Residents are not able to add cases after completing the program.
6. **How can a resident use information from their Case Logs?**
   During residency, Case Logs are useful to help residents determine the breadth and depth of
their procedural experience. Case Logs can be used to inform revision of rotations to allow
for more experience in a procedure or prevent too much experience with one type of patient
or procedure at the expense of broader educational goals. After residency, Case Logs
provide a record of experiences when applying for fellowships or for hospital credentialing.

7. **How can a program director use information from resident Case Logs?**
   Program directors can apply filters for several of the reports available on the Case Log tab in
ADS to determine how individual rotations, participating sites, or supervising faculty
members are contributing to the residents’ experiences. Program directors can also review
when and how residents are recording their cases. For example, if a program requires
residents to enter cases each week, the Resident Activity Report can be run weekly, and it
can be quickly identified if a resident has not logged any cases.

8. **How does the Review Committee use Case Log data?**
   The Review Committee-International will review minimum case reports for those residents that
have graduated from the program to determine how many residents met required minimums
and which procedures were deficient. The Committee will also review the data to determine if
residents are completing large numbers of certain procedures while not meeting minimums in
all procedures. These analyses will allow the Committee to determine the breadth and depth
of experiences provided by a program and to judge the residents' service obligations.
Citations will result if minimums are not consistently met, if the Committee judges that
residents are performing certain procedures as excessive service over education, and if
resident reporting is inconsistent or lacking.

9. **What are the minimum case numbers for dermatology?**
   The following table summarizes minimum procedure requirements for graduating residents in
dermatology.

<table>
<thead>
<tr>
<th>Procedure</th>
<th>Minimum number</th>
<th>Role</th>
</tr>
</thead>
<tbody>
<tr>
<td>Excision, benign or malignant</td>
<td>50</td>
<td>Surgeon</td>
</tr>
<tr>
<td>Repair (closure), simple, intermediate, complex</td>
<td>50</td>
<td>Surgeon</td>
</tr>
<tr>
<td>Mohs micrographic surgery</td>
<td>15</td>
<td>Surgeon or Observer*</td>
</tr>
<tr>
<td>Laser, combined (ablative, non-ablative, vascular)</td>
<td>15</td>
<td>Surgeon or Observer*</td>
</tr>
<tr>
<td>Botulinum toxin chemodeinnervation</td>
<td>10</td>
<td>Surgeon or Observer*</td>
</tr>
<tr>
<td>Soft tissue augmentation, skin fillers</td>
<td>5</td>
<td>Surgeon or Observer*</td>
</tr>
<tr>
<td>Flaps and grafts, split or full</td>
<td>13</td>
<td>Surgeon or Observer*</td>
</tr>
<tr>
<td>Nail procedures</td>
<td>3</td>
<td>Surgeon or Observer*</td>
</tr>
</tbody>
</table>

*Surgeon or Observer indicates that a resident can gain credit in this category by either
performing or observing the procedure.
