ACGME International

Advanced Specialty Program Requirements for Graduate Medical Education in Renal Medicine (Nephrology) (Internal Medicine)

Reformatted: 1 April 2022
Revised: 12 December 2015, Effective: 1 July 2016
Initial Approval: 2 October 2012
ACGME International Specialty Program Requirements for Graduate Medical Education
in Renal Medicine (Nephrology) (Internal Medicine)

Int. Introduction

Background and Intent: Programs must achieve and maintain Foundational Accreditation
according to the ACGME-I Foundational Requirements prior to receiving Advanced
Specialty Accreditation. The Advanced Specialty Requirements noted below
complement the ACGME-I Foundational Requirements. For each section, the Advanced
Specialty Requirements should be considered together with the Foundational
Requirements.

Int. I. Definition and Scope of the Specialty

The medicine-based specialty of Renal medicine (nephrology) is the
subspecialty of internal medicine that focuses on the diagnosis and
treatment of diseases of the kidney, including electrolyte
disturbances and hypertension, and the care of those requiring renal
replacement therapy, including dialysis and renal transplant patients.

Int. II. Duration of Education

Int. II.A. The educational program in renal medicine (nephrology) must be 24 or 36
months in length.

I. Institution

I.A. Sponsoring Institution

I.A.1. A fellowship in renal medicine (nephrology) must function as an
integral part of an ACGME-I-accredited residency in internal
medicine.

I.B. Participating Sites

See International Foundational Requirements, Section I.B.

II. Program Personnel and Resources

II.A. Program Director

See International Foundational Requirements, Section II.A.

II.B. Faculty

See International Foundational Requirements, Section II.B.

II.C. Other Program Personnel

II.C.1. There must be a close working relationship with dietary and/or nutrition
services and social services, as well as with specialists in diagnostic
radiology, general surgery, interventional nephrology and/or

interventional radiology, obstetrics and gynecology, pathology, psychiatry, vascular surgery, and urology.

II.D. Resources

II.D.1. The following laboratory and imaging services must be available at the primary clinical site or at participating sites, including:

II.D.1.a) biochemistry and serologic laboratories; and,

II.D.1.b) ultrasound, computed tomography (CT), magnetic resonance imaging (MRI), and a diagnostic radionuclide laboratory.

II.D.2. There must be surgical and pathological support available for the modern practice of renal medicine (nephrology), including an active renal transplant service.

II.D.2.a) The primary clinical site must be approved to perform renal transplantation or must have a formal written agreement with such an institution, ensuring that renal medicine (nephrology) fellows receive the requisite experience with renal transplantation.

II.D.3. Surgery for vascular and peritoneal dialysis access must be available.

II.D.4. Electron and immunofluorescence microscopy and other special studies for the preparation and evaluation of renal biopsy material must be available.

II.D.5. The program must provide acute and chronic hemodialysis, continuous renal replacement therapy, peritoneal dialysis, and renal biopsy service.

II.D.5.a) The program should be of sufficient size to ensure fellows’ adequate exposure to patients with acute kidney injury and end-stage renal disease, including patients on chronic hemodialysis and peritoneal dialysis, to ensure adequate education and experience in chronic dialysis.

III. Fellow Appointment

III.A. Eligibility Criteria

III.A.1. Prior to appointment in the program, fellows should have completed an ACGME-I-accredited residency program in internal medicine, or an internal medicine residency program acceptable to the Sponsoring Institution’s Graduate Medical Education Committee.

III.B. Number of Fellows

See International Foundational Requirements, Section III.B.

IV. Specialty-Specific Educational Program
IV.A. ACGME-I Competencies

IV.A.1. The program must integrate the following ACGME-I Competencies into the curriculum.

IV.A.1.a) Professionalism
- Fellows must demonstrate a commitment to professionalism and an adherence to ethical principles.

IV.A.1.b) Patient Care and Procedural Skills
- Fellows must provide patient care that is compassionate, appropriate, and effective for the treatment of health problems and the promotion of health. Fellows must demonstrate competence in managing the care of patients:
  - in a variety of health care settings, including inpatient and ambulatory settings; the practice of health promotion, disease prevention, diagnosis, care, and treatment of men and women from adolescence to old age, during health and all stages of illness;
- using critical thinking and evidence-based tools;
- using population-based data; and,
- with whom they have limited or no physical contact, through the use of telemedicine.

IV.A.1.b).(2) Fellows must demonstrate competence in the evaluation and management of:
- acute kidney injury;
- chronic kidney disease;
- disorders of fluid, electrolyte, and acid-base regulation;
- disorders of mineral metabolism, including nephrolithiasis and renal osteodystrophy;
- drug dosing adjustments and nephrotoxicity associated with alterations in drug metabolism and pharmacokinetics in renal disease;
- end-stage renal disease (ESRD), including symptom management;
- genetic and inherited renal disorders, including
inherited diseases of transport, cystic diseases, and other congenital disorders;
glomerular and vascular diseases, including the atheroembolic renal disease, diabetic nephropathy, and glomerulonephritis; ;
geriatric aspects of renal medicine (nephrology);
hypertensive disorders;
renal disorders of pregnancy;
renal transplant patients;
tubulointerstitial renal diseases; and,
urinary tract infections.

Fellows must be able to perform all medical, diagnostic, and surgical procedures considered essential to the subspecialty, including:

performing diagnostic and therapeutic procedures relevant to their individual specific planned career path, to include:
dialysis therapy;
performance of:
acute and chronic hemodialysis;
continuous renal replacement therapy;
peritoneal dialysis; and,
placement of temporary vascular access for hemodialysis and related procedures.
treating their patients' conditions with practices that are patient-centered, safe, scientifically based, effective, timely, and cost-effective, to include:
delivering effective and patient-centered education regarding options for management of ESRD, including transplant, home dialysis therapies, in-center hemodialysis, and support care;
selecting patients for native or transplant kidney biopsy, including:
IV.A.1.b).(3).b).(ii).(a) interpretation and clinical application of results, and recognizing and managing adverse events; and,

IV.A.1.b).(3).b).(ii).(b) providing counsel to patients about the procedure, recognizing potential complications, and taking measures to reduce the risk of the procedure.

IV.A.1.b).(3).b).(iii) selecting patients for temporary dialysis access, identifying potential complications and taking measures to reduce the risk of the procedure, providing counsel to patients about the procedure, and recognizing and managing adverse events after placement.

IV.A.1.b).(3).(c) using diagnostic and/or imaging studies relevant to the care of the patient, to include urinalysis.

IV.A.1.c) Medical Knowledge

IV.A.1.c).(1) Fellows must demonstrate knowledge of established and evolving biomedical clinical, epidemiological, and social-behavioral sciences, as well as the application of this knowledge to patient care. Fellows must demonstrate knowledge of:

IV.A.1.c).(1).(a) the scientific method of problem solving and evidence-based decision-making;

IV.A.1.c).(1).(b) indications, contraindications, and techniques for, and limitations, complications, and interpretation of results of those diagnostic and therapeutic procedures integral to the discipline, including the appropriate indications for and use of screening tests and procedures;

IV.A.1.c).(1).(c) clinical pharmacology, including drug metabolism, pharmacokinetics, and the effects of drugs on renal structure and function;

IV.A.1.c).(1).(d) dialysis and extracorporeal therapy, including:

IV.A.1.c).(1).(d).(i) artificial membranes used in hemodialysis and biocompatibility;

IV.A.1.c).(1).(d).(ii) dialysis modes and their relation to metabolism;

IV.A.1.c).(1).(d).(iii) dialysis water treatment, delivery systems, and reuse of artificial kidneys;
IV.A.1.c).(1).(d).(iv) kinetic principles of hemodialysis and peritoneal dialysis.

IV.A.1.c).(1).(d).(v) pharmacology of commonly used medications and their kinetic and dosage alteration with hemodialysis and peritoneal dialysis;

IV.A.1.c).(1).(d).(vi) principles of dialysis access (acute and chronic vascular and peritoneal), to include indications, techniques, and complications;

IV.A.1.c).(1).(d).(vii) short- and long-term complications of each mode of dialysis and its management; and,

IV.A.1.c).(1).(d).(viii) technical and regulatory aspects of home and in-center dialysis;

IV.A.1.c).(1).(d).(ix) the indication for each mode of dialysis;

IV.A.1.c).(1).(d).(x) urea kinetics and protein catabolic rate.

IV.A.1.c).(1).(e). geriatric medicine, including:

IV.A.1.c).(1).(e).(i) physiology and pathology of the aging kidney; and,

IV.A.1.c).(1).(e).(ii) drug dosing and renal toxicity in elderly patients.

IV.A.1.c).(1).(f) immunologic aspects of renal disease;

IV.A.1.c).(1).(g) indications for and interpretations of radiologic tests of the kidney and urinary tract;

IV.A.1.c).(1).(h) management of renal disorders in non-renal organ transplantation;

IV.A.1.c).(1).(i) normal and abnormal blood pressure regulation;

IV.A.1.c).(1).(j) normal and disordered fluid, electrolyte, and acid-base metabolism;

IV.A.1.c).(1).(k) normal mineral metabolism and its alteration in renal diseases, metabolic bone disease, and nephrolithiasis;

IV.A.1.c).(1).(l) nutritional aspects of renal disorders;

IV.A.1.c).(1).(m) pathogenesis, natural history, and management of congenital and acquired diseases of the kidney and urinary tract, and renal diseases associated with systemic disorders;
principles and practice of hemodialysis and peritoneal dialysis;

psychosocial and ethical issues of dialysis;

renal anatomy, physiology, and pathology;

renal transplantation, including:

- biology of transplantation rejection;
- indications and contraindications for renal transplantation;
- principles of transplant recipient evaluation and selection;
- principles of evaluation of transplant donors, both living and cadaveric, to include histocompatibility testing;
- principles of organ harvesting, preservation, and sharing;
- psychosocial aspects of organ donation and transplantation; and,
- pathogenesis and management of acute renal allograft dysfunction.

technology of hemodialysis and peritoneal dialysis.

Fellows must demonstrate sufficient knowledge specific to the subspecialty of renal medicine (nephrology), including application of technology appropriate for the clinical context, to include evolving technologies.

Practice-Based Learning and Improvement

Fellows must demonstrate the ability to investigate and evaluate their care of patients, to appraise and assimilate scientific evidence, and to continuously improve patient care based on constant self-evaluation and lifelong learning.

Interpersonal and Communication Skills

Fellows must demonstrate interpersonal and communication skills that result in the effective exchange of information and collaboration with patients, patients’ families, and health professionals.
IV.A.1.f) Systems-Based Practice

Fellows must demonstrate an awareness of and responsiveness to the larger context and system of health care, including the social determinates of health, as well as the ability to call effectively on other resources in the system to produce optimal care.

IV.B. Regularly Scheduled Educational Activities

IV.B.1. The educational program must include didactic instruction based on the core knowledge content in renal medicine (nephrology).

IV.B.1.a) Fellows must have a sufficient number of didactic sessions to ensure fellow-fellow and fellow-and-faculty member interaction.

IV.B.2. The program must ensure that fellows have an opportunity to review all knowledge content from conferences that they could not attend.

IV.B.3. Fellows must have formal instruction in indications for and interpretation of reports related to:

IV.B.3.a) balloon angioplasty of vascular access and other procedures utilized in the maintenance of chronic vascular access patency;

IV.B.3.b) management of peritoneal catheters;

IV.B.3.c) radiology of vascular access;

IV.B.3.d) renal imaging; and,

IV.B.3.e) therapeutic plasmapheresis.

IV.B.4. Fellows must receive instruction in practice management relevant to renal medicine (nephrology).

IV.C. Clinical Experiences

IV.C.1. Assignment of rotations must be structured to minimize the frequency of rotational transitions, and rotations must be of sufficient length to provide a quality educational experience, defined by continuity of patient care, ongoing supervision, longitudinal relationships with faculty members, and meaningful assessment and feedback.

IV.C.2. Rotations must be structured to allow fellows to function as a part of an effective interprofessional team that works together toward the shared goals of patient safety and quality improvement.

IV.C.3. Rotations must be structured to minimize conflicting inpatient and outpatient responsibilities.

IV.C.4. At least 12 months of education must be devoted to clinical experience.
IV.C.4.a) This must include at least four months of supervised involvement in dialysis therapy, including both hemodialysis and peritoneal dialysis, to include:

IV.C.4.a).(1) assessment of hemodialysis and peritoneal dialysis efficiency;

IV.C.4.a).(2) the complications of hemodialysis and peritoneal dialysis;

IV.C.4.a).(3) determining special nutritional requirements of patients undergoing hemodialysis and peritoneal dialysis;

IV.C.4.a).(4) end-of-life care and pain management for patients undergoing chronic hemodialysis and peritoneal dialysis;

IV.C.4.a).(5) evaluation of end-stage renal disease patients for peritoneal dialysis and hemodialysis, and their instruction regarding these treatment options;

IV.C.4.a).(1) assessment of efficiency of peritoneal dialysis, home dialysis, and hemodialysis;

IV.C.4.a).(2) determining special nutritional requirements of patients undergoing peritoneal dialysis, home hemodialysis, and hemodialysis;

IV.C.4.a).(3) education and evaluation of pre-dialysis chronic kidney disease patients and dialysis patients regarding management of Stage 5 chronic kidney disease, including transplant, home dialysis modalities, in-center hemodialysis, and supportive care;

IV.C.4.a).(4) end-of-life care and pain management for patients undergoing chronic peritoneal dialysis, home hemodialysis, and hemodialysis, the complications of peritoneal dialysis, home hemodialysis, and hemodialysis;

IV.C.4.a).(5) evaluation and management of medical complications in patients during and between hemodialysis and peritoneal dialyses;

IV.C.4.a).(6) evaluation and selection of patients for acute hemodialysis or continuous renal replacement therapies;

IV.C.4.a).(7) examination of dialysis access for hemodialysis and peritoneal dialysis;

IV.C.4.a).(8) longitudinal care of patients treated with home dialysis and in-center hemodialysis;

IV.C.4.a).(9) long-term follow-up of patients undergoing chronic hemodialysis, home dialysis, and peritoneal dialysis, and management of symptoms of ESRD;
IV.C.4.a).(10) modification of drug dosage during hemodialysis and peritoneal dialysis; and,

IV.C.4.a).(11) writing a hemodialysis, home dialysis, and peritoneal dialysis prescription and how to assess dialysis adequacy.

IV.C.5.a) Fellows must have at least two months of clinical experience on an active renal transplant service, including supervised involvement in pre- and post-transplant care, including:

IV.C.5.a).(1) clinical and laboratory diagnosis of all forms of rejection;

IV.C.5.a).(2) evaluation and selection of transplant candidates;

IV.C.5.a).(3) immediate post-operative management of transplant recipients, to include administration of immunosuppressants to a minimum of 10 new renal transplant recipients;

IV.C.5.a).(4) managing patients in the ambulatory setting for at least three months of at least 20 patients per fellow;

IV.C.5.a).(5) medical management of rejection, to include use of immunosuppressive drugs and other agents;

IV.C.5.a).(6) pre-operative evaluation and preparation of transplant recipients and donors;

IV.C.5.a).(7) psychosocial and ethical issues of renal transplantation; and,

IV.C.5.a).(8) recognition and medical management of the surgical and non-surgical complications of transplantations.

IV.C.5.b) Each fellow must see at least 10 new renal transplant patients during the fellowship.

IV.C.5.b) Fellows’ clinical experience must include management of patients with renal disorders in the intensive care unit setting.

IV.C.5.c) Fellows must have experience in the role of a renal medicine (nephrology) consultant in both the inpatient and outpatient settings.

IV.C.5.c).(1) balloon angioplasty of vascular access and other procedures utilized in the maintenance of chronic vascular access patency;

IV.C.5.c).(2) management of peritoneal catheters;
IV.C.5.c).(3) radiology of vascular access;  
IV.C.5.c).(4) renal imaging; and,  
IV.C.5.c).(5) therapeutic plasmapheresis.

IV.C.6. The program must provide educational experiences in team-based care that allow fellows to interact with and learn from other health care professionals.

IV.C.7. The educational program must provide fellows with elective experiences to allow them to participate in opportunities relevant to their future practice or to further skill/competence development.

IV.C.7.a) When requested, additional training and experiences should be made available for fellows to achieve competence in the performance of:  
IV.C.7.a).(1) native or kidney biopsy; and,  
IV.C.7.a).(2) placement of temporary dialysis access.

IV.C.8. Fellows must participate in training using simulation.

IV.C.9. Fellows should have a structured continuity ambulatory clinic experience for the duration of the program that exposes them to the breadth and depth of renal medicine (nephrology).

IV.C.9.a) This experience should average one half-day each week throughout the education program.

IV.C.9.e) This should include an appropriate distribution of patients of each gender and a diversity of ages.

IV.C.9.a) This experience should average one half-day each week throughout the education program.

IV.C.8.b) Each fellow should, on average, be responsible for four to eight patients during each half-day session.

IV.C.9.a) Each fellow should, on average, be responsible for no more than eight to 12 patients during each half-day ambulatory session.

IV.C.9.b) The continuing patient care experience should not be interrupted by more than one month, excluding a fellow's vacation.

IV.D. Scholarly Activity

IV.D.1. Fellows’ Scholarly Activity

IV.D.1.a) While in the program, each fellow must complete at least one of the following scholarly activities: participation in grand rounds; poster presentations; workshops; quality improvement presentations; podium presentations; grant leadership; non-peer-reviewed
IV.D.2. Faculty Scholarly Activity

See International Foundational Requirements, Section IV.D.2.

V. Evaluation

See International Foundational Requirements, Section V.

VI. The Learning and Working Environment

VI.A. Principles

See International Foundational Requirements, Section VI.A.

VI.B. Patient Safety

See International Foundational Requirements, Section VI.B.

VI.C. Quality Improvement

See International Foundational Requirements, Section VI.C.

VI.D. Supervision and Accountability

VI.D.1. Direct supervision of procedures performed by each fellow must occur until competence has been acquired and documented by the program director.

VI.E. Professionalism

See International Foundational Requirements, Section VI.E.

VI.F. Well-Being

See International Foundational Requirements, Section VI.F.

VI.G. Fatigue

See International Foundational Requirements, Section VI.G.

VI.H. Transitions of Care

See International Foundational Requirements, Section VI.H.

VI.I. Clinical Experience and Education

See International Foundational Requirements, Section VI.I.

VI.J. On-Call Activities
See International Foundational Requirements, Section VI.J.
